ACC Track Skewer FRT

80.1900.005.000

**STAINLESS STEEL
TRACK SKEWER**

30 grams. CrMo Steel shaft. Aluminum end caps.

Attention: Lubricate the threads of your new ZIPP Stainless Steel front track skewer with an anti-seize compound to ensure proper function.

Cycling is an inherently dangerous activity. Help protect yourself by reading and following the instructions for your new ZIPP Stainless Steel front track skewer. Please contact ZIPP or your local dealer with any questions you may have about the proper use of your skewer.

**ZIPP Stainless Steel Front Track Skewer
Installation Instructions**

Simply remove your road front quick release, install the track skewer and tighten it down with one 5mm allen key to a maximum of 55 lb/in torque.

For any additional questions about the installation or maintenance of this or any Zipp product, please contact our customer service department, or your local Zipp retailer. Thank you again, now go to the track!
